EXPERIENCE

DevCareer - *Frontend Engineer* [devcareer.io]   AUGUST - NOVEMBER

- I work with a team of 8 developers to build web applications using Trello and Pivotal tracker for project management.
- Led the team of 4 developers to build static Lopper website using Git and Github for version control, HTML5, CSS3, SASS and Node.js. My role was to lead the team, create reusable components, review, test and merge good PRs.
- Currently collaborating with the entire team to build Dae-alright web application using React & Redux, Git/Github, Node and Pivotal tracker. My role is to build User interfaces, consume APIs and add security to application. I create component templates in such a way that other team members can make use of the code to create other components.

Andela Learning Community 4.0 - *Mobile web Specialist*   MAY 2019 - JAN. 2020

- Joined Andela Learning Community Mobile web track and I learn mobile web development with Angular.js. I was provided the resources and tutorials to learn and take skill assessments in order to move to the next phase.
- Built Album store project page as final project with Angular.js,Typescript, Git and Github

Rasmed Publications - *Web developer*   JAN. 2019 - AUG. 2019

- Worked with Digital team to design fliers and book covers using Adobe Photoshop and Illustrator. My role was to resize the images and upload them to the website.
- Learned Wordpress and managed the company's official website, fix the bugs and update it on a daily basis.

HNG 5.0 Internship - *Software Engineer Intern*   APR. 2019 - JUN. 2019

- Worked with a team of Backend developers using trello for project management and Git/Github for collaboration. My role was to write code to protect the App.

- Built server side of devalert web application with the backend team using Node.js, Express.js and handlebar template engine.
